

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

The Department of Natural Resources is providing this report to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3. The application files are available for public inspection at the Division of Water's office in Indianapolis. Please contact the Division's Technical Services Section at (317) 232-4160 or the toll free number 1-877-928-3755 to make an appointment for file review. Photocopies may be made for a nominal charge of \$0.10 per 8 1/2 " X 11" copy.

A pre-action public hearing on an application may be requested by filing a written petition with the Director, Division of Water:

Michael W. Neyer, P.E., Director
Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

For a petition to be considered valid it must:

1. Contain the typed or legibly printed name and complete mailing address of each petitioner;
2. Be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
3. Affirm that each signatory to the petition satisfies the requirements of item 2; and
4. Identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted.

A person may request that the Department provide written notice of its action on an application by filing a written request with:

Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

The request must identify the application by either the application # or the applicant's name and the project description.

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : DR-424

Lake : Lake Manitou

Applicant : Fulton County Surveyor's Office
Don Towne, County Surveyor
Fulton County Office Building
125 East 9th Street
Rochester, IN 46975-1500

Description : The project consists of removing silt to the original bottom depth of the ditch. Details of the project are contained in information and plans received at the Division of Water on July 12, 2004 and July 26, 2004.

Location : Beginning at the State Road 14 stream crossing in Setion 10 and continuing upstream approximately 2500' to the railrad crossing
DOWNSTREAM: near Rochester, Rochester Township, Fulton County
NE¼, SE¼, Section 10, T 30N, R 3E, Rochester Quadrangle
Quad Code: 4108612
UTM Coordinates: Downstream 4545822 North, 569585 East
UPSTREAM:
UTM Coordinates: Upstream 4546040 North, 570154 East

Statute/Rule : "Ditch" Act, IC 14-26-5

30 Day Public Notice Report

Application # : FW-22551

Stream : Smith Ditch

Applicant : *Indiana Department of Transportation
Carole Korbly Scott
100 North Senate Avenue, Room N642
Indianapolis, IN 46204-2249

Description : The existing 9.84' x 6.89' x 64' long box culvert carrying US 35/State Road 22 over Smith Ditch will be replaced with a new culvert system to reduce upstream flood damages. The new crossing will consist of a 20' x 8' x 144' long box culvert set in concrete headwalls. The inlet end of the culvert will be beveled. The culvert and headwalls will be skewed 6 degrees to align with streamflow. Minor channel shaping will occur both downstream and upstream of the new culvert to improve the flow transition at the crossing. The shaping will be confined to the construction right-of-way. The reshaped areas will be stabilized with a 2' layer of riprap over geotextile fabric. The roadway will be elevated approximately 4' above the existing road elevations. W-Beam guardrails will be placed along each side of the roadway over the channel. Details of the project are contained in information and plans received at the Division of Water on September 15, 2003 and April 14, 2004.

Location : US 35/ State Road 22 over Smith Ditch
near Greentown, Liberty Township, Howard County
NE¼, NE¼, NE¼, Section 6, T 23N, R 5E, Greentown Quadrangle
Quad Code: 4008548
UTM Coordinates: Downstream 4481052 North, 585175 East

Statute/Rule : Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10

30 Day Public Notice Report

Application # : FW-22972

Lake : Unnamed Tributary Cedar Lake

Applicant : Robert Gross, Jr.
Cedar Lake Enhancement Association
P.O. Box 823
Cedar Lake, IN 46303-0823

Description : A total of approximately 3,000 linear feet at various locations along a 6400' reach of the stream will be stabilized to prevent erosion and sediment deposits into Cedar Lake. Work will include minor spot grading in order to provide a stable and uniform base for erosion control blankets. All excavated material will be removed to an upland location. The blanket material will be installed as needed from the base of the stream bank to approximately 10 feet landward up the stream bank. Approximately 60 cubic yards of rip-rap will be placed as needed. The rip-rap will be keyed into the bank of the streambed to a depth of one foot and will conform to the existing bank at the project limits. It will have a maximum height of 6 ft, a maximum stream ward projection of 1 ft beyond the existing bank, and approximately 5:1 side slopes. The stream banks will be seeded with native grasses in those areas where volunteer or native vegetation is unlikely to grow. Details of the project are contained in information received electronically at the Division of Water on July 7, 2004, and in plans and information received by the Division of Water on July 16, 2004, and July 19, 2004.

Location : Along the right and left stream bank, approximately 600' upstream (west) of the inlet to Cedar Lake and extending 6400' upstream
DOWNSTREAM: at Cedar Lake, Hanover Township, Lake County
SW $\frac{1}{4}$, NW $\frac{1}{4}$, NE $\frac{1}{4}$, Section 34, T 34N, R 9W, Lowell Quadrangle

Application # : FW-22986

Stream : Coffee Creek

Applicant : *Indiana Department of Transportation
Carole Korbly Scott
100 North Senate Avenue, Room N642
Indianapolis, IN 46204-2249

Description : The existing State Road 49 bridges over Coffee Creek will be rehabilitated in both the northbound and southbound lanes. The bridge work will include new copings, bridge railings and a bridge deck overlay. Additionally, approximately 167' of the eroded stream banks will be reshaped and stabilized with riprap over geotextile fabric to protect from future erosion. The riprap will be approximately 4' high with 2:1 sideslopes, keyed into the streambed and conform to the existing banks at the project limits. A temporary causeway approximately 4' high and 20' long with 4-36" diameter metal pipes to maintain low flow will be placed during construction activities. Details of the project are contained in information and plans received at the Division of Water on July 15, 2004.

Location : at the State Road 49 dual lane bridges over Coffee Creek
near Charlestown, Jackson Township, Porter County
NE¼, NW¼, SW¼, Section 6, T 36N, R 5W, Chesterton Quadrangle
Quad Code: 4108751

Application # : FW-22987

Stream : Little Calumet River

Applicant : *Indiana Department of Transportation
Carole Korbly Scott
100 North Senate Avenue, Room N642
Indianapolis, IN 46204-2249

Description : A new bridge will be constructed to carry I-80/94/US 6 across the river. The new bridge will replace the old bridge at the same site. The new structure will have 2 superstructure units; a 3-span continuous plate girder bridge with span lengths of 98.4', 124.7', and 114.8' crossing the Little Calumet River and a 3-span continuous rolled shape with span lengths of 78.7', 91.8', and 65.6' crossing a railroad right-of-way. The structure will have an out-to-out length of 581.3' and a clear roadway width of 82.7' east bound and 82.7' west bound. The abutments will have 2:1 sideslopes armored with limestone riprap placed over geotextile fabric. The west abutment and piers 1 and 2 will be skewed 30 degrees to align with the streamflow. The east abutment, and piers 3,4, and 5 will be skewed 20 degrees to align with the railroad. The approach roads will be elevated a maximum of 4.9' above the existing grade. The proposed structure supports are designed such that the existing structure can be demolished in stages while the new structure is under constructed. Also, a 54' stormwater outfall structure will be constructed near the Indiana/Illinois state line to replace an existing outfall structure in Illinois. Two 54' pipes will run from I-80/94 north to the river. the pipes will terminate with a headwall that will conform to the bank slope. An energy dissipater will be constructed at the end of the toe wall. The dissipater will consist of a concrete apron and riprap placed over a geotextile fabric. Details of the project are contained in information and plans received at the Division of Water on July 15, 2004.

Location : Along the east and west banks of Little Calumet River, beginning at I-80/94/US 6 bridge and continuing upstream approximately 200'. The outfall structure is located along the south/west bank approximately 114' east of the State Line and continuing downstream approximately 6' near Munster, North Township, Lake County

30 Day Public Notice Report

Application # : FW-22992

Stream : Cow Creek

Applicant : Huntington County Commissioners
201 North Jefferson Street
Huntington, IN 46750

Description : A new single-span timber bridge will be constructed over Cow Creek to replace an existing single-span steel structure. The new structure will have a span length of 32'-0", a 24'-0" clear roadway, and an out-to-out bridge width of 34'-8". The abutments will be skewed 15 degrees to align with the existing channel and have 2:1 spill through slopes armoured with revetment riprap for erosion control. The new approaches will be elevated 3" above the existing to smooth the grade at the bridge to meet design standards. Details of the project are contained in plans and information received at the Division of Water on July 15, 2004.

Location : Over Cow Creek at the Seminary Street bridge
at Roanoke, Jackson Township, Huntington County
SE¼, SE¼, SE¼, Section 15, T 29N, R 10E, Huntington Quadrangle

30 Day Public Notice Report

Application # : FW-22994

Stream : East Fork White River

Applicant : Jennings Water Inc
Bryan Lane
1595 East Buckeye Street
North Vernon, IN 47265-9796

Description : A new well including a well tower, valve vault and a well control building (which will control four wells) will replace an existing well. Fill will be placed in an approximate 80'x 80' area to a height of eleven (11) ft. above existing grade with 3:1 sideslopes. The 16'x 16' well control building will be constructed at the top of the fill with a floor elevation of 594.0' NGVD. The fill sideslopes will be stabilized with riprap over geotextile fabric. Additionally, a 16" diameter buried raw water main will be placed along the county road from the wells. Details of the project are contained in plans and information received at the Division of Water on July 19, 2004.

Location : On the left (east) overbank, approximately 7000' downstream of the confluence of Sand Creek
near Reddington, Redding Township, Jackson County

Application # : FW-22996

Stream : Maumee River

Applicant : Allen County Highway Department
Michael R Fitch, PE
Executive Director
One West Superior Street
Fort Wayne, IN 46802-1299

Description : Approximately 140' the river's eroded north bank will be restored to a 1:1 slope and protected with stone revetment riprap laid over a geotextile fabric. The riprap will be keyed into the streambed at its base and will conform to the existing bank at the project limits. Also, an existing eroded walking trail will be repaired with asphalt over 12" of #53 compacted aggregate. The walking path will be at grade. Details of the project are contained in information and plans received at the Division of Water on July 20, 2004.

Location : Along the north bank of the river beginning 200 feet east of the Coliseum Boulevard (930) bridge crossing and extending 1500' upstream (southeast).

Stream : Wabash River

Applicant : *Indiana Department of Transportation
Carole Korbly Scott
100 North Senate Avenue, Room N642
Indianapolis, IN 46204-2249

Description : The superstructure of the existing eleven (11) span bridge carrying highway I-65 over the Wabash River will be widened to 3 lanes in each direction. The twin 43'-0" wide decks will be widened to the outside 2'-8" and to the inside 22'-5 ½" thereby increasing the out-to-out width to 68'-1 ½". The pier caps will be widened to the outside for the new 2'-8" widening and a new free standing pier will be placed between the existing piers. Revetment riprap over geotextiles will be placed under the widened portions of the bridge. The approach roads will not be raised. A temporary bridge will be constructed in order to work on the new piers. Details of the project are contained in plans and information received at the Division of Water on July 20, 2004.

Location : At the I-65 twin bridges over the Wabash River
near Lafayette, Tippecanoe Township, Tippecanoe County
NW¼, SE¼, NE¼, Section 3, T 23N, R 4W, Lafayette East Quadrangle

Stream : West Fork White River

Applicant : *Indiana Department of Transportation
Carole Korbly Scott
100 North Senate Avenue, Room N642
Indianapolis, IN 46204-2249

Description : INDOT proposes to rehabilitate the existing 5-span continuous steel I-Girder and composite continuous steel box girder bridge at the State Road 157 stream crossing. The main features of the rehabilitation will include: replacing the existing bridge and approach railing, reconstructing the bridge deck and mudwalls, replacing the existing expansion joints, removing portions of the deck to accommodate new drains, replacing the approach slabs, grading the shoulders within proposed guardrail limits, and placing riprap over geotextile around the piers. The clear roadway width of the repaired structure will be 44'-6", which will consist of two 12' wide traffic lanes and 10'-3" shoulders. Federal and state funds will be utilized for this project. Details of the project are contained in information and plans received at the Division of Water on July 21, 2004

Location : State Road 157 over White River approximately 1 mile east of State Road 67 in Worthington
DOWNSTREAM: near Worthington, Jefferson Township, Greene County
S $\frac{1}{2}$, SE $\frac{1}{4}$, SE $\frac{1}{4}$, Section 21, T 8N, R 5W, Bloomfield Quadrangle

Application # : FW-23004

Stream : Fall Creek

Applicant : Indianapolis Water Company
Charles Voltz
1220 Waterway Boulevard
Indianapolis, IN 46202-1220

Description : Three (3) production wells, a well collection line, and a finished water distribution main will be constructed as part of a larger project to increase the capacity of Indianapolis Water's existing Geist Water Treatment Plant from 4 MGD (million gallons per day) to 8 MGD. Collection Well6 (GWF #6) will have a capacity of 1800 GPM (gallons per minute) and Collection Wells 7 and 8 (GWF #7 and GWF #8) will both have a capacity of 1400 GPM. The top of the well casing will be 3' above the base flood elevation with a maximum height of 12' from the finished grade. The well collection line will consist of approximately 8300' of PVC and HDPE pipe ranging from 12" to 20" in diameter. The main distribution line will be approximately 1630' of 20" diameter PVD and HDPE pipe. All buried piping will have a minimum of 4.5' of cover. Some sections of the pipe will be bored to avoid any wetlands and the tributaries of Fall Creek. The remaining sections of the pipe will be installed via an open cut excavation. During construction, spoil will be stockpiled on site. The spoil will be used to return the site to its original elevation after construction is complete. Any excess spoil will be removed from the site. Details of the project are contained in information and plans received at the Division of Water on July 23, 2004, July 26, 2004, July 27, 2004, July 28, 2004, July 29, 2004, August 2, 2004, and August 3, 2004.

Location : Beginning at the downstream side of Geist Reservoir Dam, extending southwest approximately 7000' along the right (west) overbank of the creek

30 Day Public Notice Report

Application # : FW-23019

Stream : Wabash River

Applicant : Bluffton Parks and Recreation Board
Susan Campbell
128 E. Market Street
Bluffton, IN 46714

Description : The Bluffton Parks and Recreation Board, in conjunction with the City of Bluffton and the Rotary International Club of Bluffton, wishes to construct a permanent "Performance Stage" in T.W. Kehoe Riverfront Park. T.W. Kehoe Riverfront Park is a 3.0-acre passive recreational facility located along the North bank of the Wabash River in Bluffton. The park's principle amenities are walking trails, pavilion, restrooms, and an amphitheater for outdoor concerts and performances. There is approximately 1,000 lin. ft. of shoreline along the Wabash River. The project would provide a permanent performance stage for the 8-10 events that are held in the park each summer. Currently, the Bluffton Parks and Recreation Department must erect and teardown a portable stage for each event. This process is labor intense and costly. The proposed permanent stage would be concrete structure, approximately 20' deep by 30' wide and 3' above existing grade. The stage will have a vinyl canopy that is supported by two mast poles. Each about 10 inches in diameter. These mast poles would be permanently fixed to the concrete stage. The lowest point of the vinyl canopy is 10' above the stage. The canopy is removable for winter storage and maintenance. In addition to the canopy, the stage is designed to facilitate temporary sound deflection panels located behind the performers. These panels are approximately 4' by 8' in size, and would be removed after each performance. Electrical power and lighting would be provided on stage and within the canopy structure. The stage would be accessed by both steps and ramps, which will be constructed in concrete. Details of the project are contained in information received electronically at the Division of Water on August 4, 2004.

Lake : Lake Michigan

Applicant : Unilever HPC USA
Kenneth Moses
1200 Calumet Avenue
Hammond, IN 46320-1015

Description : Approximately 8" to 14" of sediment (silt, sand and shells) will be removed from the interior of approximately 1000' linear feet of a 36" diameter intake aqueduct. A dive boat and barge will be stationed at the hatch at the northern end of the Hammond Marina and at the intake crib located north of the marina. Divers will enter the aqueduct through the hatch and crib, and utilizing a solids pump will remove sediment from the pipe. The solids pump will discharge into a Silttex Filter-Geotextile Tube that will be contained in the barge. The solids and filter tube will be removed to a landfill for disposal and the filtered water will flow back into the lake. Details of the project are contained in information and plans received at the Division of Water on July 26, 2004.

30 Day Public Notice Report

Application # : PL-19924

Lake : Westler Lake

Applicant : Robert W Zaugg
6241 North 450 East
Ossian, IN 46777-9646

Description : A new underwater beach will be constructed in front of Brills Fourth Addition lot 49 on Westler Lake to provide an area suitable for swimming. The beach will consist of 4" to 6" thick layer of 7/64 inch clean, washed pea gravel placed directly on the lakebed. The beach will begin approximately 30' east of the western property line and will extend easterly across 65' of the 135' frontage. It will have a maximum lakeward projection of 25'. Details of the project are contained in information received electronically at the Division of Water on August 3, 2004

Location : Along the north shoreline of Westler Lake, across half the frontage of Lot 49, Brills Fourth Addition
near Wolcottville, Johnson Township, LaGrange County

Statute/Rule : Lakes Preservation Act, IC 14-26-2, with the associated Public Freshwater Lake Rule, 312 IAC 11
